

Signs You Need Professional

PIPE LEAK DETECTION

Leaks in your home are not always obvious. Even if they are, they aren't always simple fixes that you can do yourself. Here are a few indicators that a professional should **inspect your home for leaks**.

Puddles on the Floor or Yard

If you discover puddles on your floor or in your yard and there is no obvious source, you may have a serious problem on your hands. Most likely, an underground pipe on your property is leaking, causing moisture to seep through your foundation or lawn. To handle **underground leaks** of any kind, you should hire a professional.

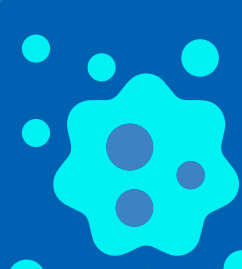

Unusually High Water Bills

Water bills can rise for a variety of reasons. High water bills, on the other hand, can indicate a leak that you cannot see. This leak could be in a pipe in a wall that hasn't yet become visible, or it could be underground, as previously described. In any case, the sooner you **hire a professional** to locate and repair it, the sooner you can stop paying for water you're not even using.

Mold Growth

If mold is growing in your home, you want to get it taken care of as soon as possible. A professional will be able to locate the **leak**, **repair** it, and deal with the **mold problem** much faster than you will be able to. Mold can spread quickly, so it's always better to stop it sooner rather than later.

Constant Sound of Running Water

If you hear dripping or whooshing sounds when no **faucets** are open and no appliances are running, there is most likely a leak somewhere. A professional can pinpoint the exact location of the leak, allowing you to reduce the amount of demolition required to fix the problem.

Clark Heating, Air Conditioning, and Plumbing can help you detect leaks and provide expert solutions that protect your home and budget. Call us at
